

March 10, 2020

**Patient Name:** Johnathan Smith

**D.O.B:** 12th March 1965

**NHS Number:** 123 456 7890

## **Consultation Summary**

**Date of Appointment:** 10th March 2020

**Consultant:** Dr. Sarah Evans

**Location:** St. Mary's Hospital, Neurology Clinic

**Reason for Referral:** Seizure management review

**Notes:** After switching to Levetiracetam, Mr. Smith experienced side effects, including irritability and mood disturbances. As a result, we transitioned to Lamotrigine. Following this adjustment, Mr. Smith reported no further seizures. His neurological examination was unremarkable, and he is now adhering to the treatment regimen without difficulty. This medication has significantly improved his seizure control.

**Plan:** Continue Lamotrigine 50mg BD. Follow-up in 6 months. No further changes to medication at this time.
