

March 10, 2004

**Patient Name:** Johnathan Smith

**D.O.B:** 12th March 1965

**NHS Number:** 123 456 7890

## **Consultation Summary**

**Date of Appointment:** 10th March 2014

**Consultant:** Dr. Emma Clarke

**Location:** St. Mary's Hospital, Neurology Clinic

**Reason for Referral:** Seizure management

**Notes:** Mr. Smith was referred to neurology after a history of seizures that started approximately 20 years ago. He was diagnosed with temporal lobe epilepsy at that time. Initially, his seizures were well-controlled with carbamazepine, and there were no issues for 15 years.

**Plan:** Continue carbamazepine for now. Consider further follow-up if seizures become more frequent or severe.
